History of spacecraft design and development. The yearbook, carried over from the previous year's title, lists eleven courses offered in the technical school. The list of courses is divided into three groups: The physics of spacecraft (for the freshman class), communications (for the sophomore class), and the basis of aircraft design and operation (for the junior class). The departments of mathematics, chemistry, and general science are listed under a separate heading. The council also conducted a survey to determine which engineering courses to include on the curriculum. One of the most popular courses is in airframe and power plant design; it has been offered since 1921.
